MSE 478/578 Scientific Communication in Materials Science & Engineering

Acknowledgments

Acknowledgments:

- Acknowledge those that aided and funded the research:
  - Authors - each author may have been funded by separate grants, scholarships or fellowships.
  - Funding agencies that aided your work even if the aid is small.
  - Fellowships & Scholarships that have paid your graduate stipend, tuition, & fees (e.g., MSE Micron PhD, NSF Grad Student Fellowship, etc.)

- Acknowledge people and funding entities - it's free.

Ask your PI!
Acknowledgments

- **Acknowledgments:**

- **Check spelling:**
  - USA - "Acknowledgments"
  - British/European - “Acknowledgements”

Acknowledgments & References

- **References:**
  - Reference only the most significant of published literature
  - Reference the earliest work
  - Should have an actual copy of the paper
  - Check all parts of every reference against the original publication
    - Before the manuscript is submitted
    - At the proof stage
Acknowledgments & References

**References:**
- Typically, there are many more mistakes in the Reference section of a manuscript than anywhere else in the manuscript.
- Be complete and ensure that the references are correct and the format is correct.
- Major mistakes to avoid:
  - Incorrectly citing a reference
  - Incorrect volume, year, title, etc.
  - Ref. has nothing to do with the subject in the sentence, table, plot, or paragraph that you’ve reference.
  - Not citing pertinent work that is in the literature
  - Not citing the first work covering the subject that you are citing
- This can cause:
  - Your paper to be rejected
  - Proposals to be declined
  - Potential collaborations to not materialize

Tenses:

**Tenses:** [3]

**Present tense:**
- For the general case and statements on what is currently known.
- E.g., statements that are:
  - General knowledge
  - Widely accepted
  - Those that can be referenced in the present tense

**Past tense:**
- Experimental results
- Observations that were made during your study
