Hello teachers,

Welcome to the CS10K Community! We are so excited for you to join our virtual community for computer science educators. To get started, please follow the steps outlined below.

- Complete the registration form.

- Don’t forget to scroll to the bottom and complete the bottom half of the registration form. You can also opt to receive our monthly e-newsletter, which provides updates on community activities.

- When complete, click on CREATE NEW ACCOUNT at the bottom of the page.

- Registration is moderated so you will not gain immediate access to the CS10K Community. The AIR social learning team will approve your membership within one business day (if not sooner). You will receive an email notification once your account has been approved.

- Once approved, click the link included in your email to log in and set your account password, update your profile, and begin exploring!
How to Join Groups

- Go to the **Groups** page. This can be accessed from the top toolbar.

- Search the listing for group(s) you want to join and click on the group name. For starters, you may want to join the **ECS** and/or **CSP** Open Groups, which provide cross-project collaboration for teachers of those courses.

- In the group, you will see:
  1. A brief description
  2. Public content
  3. Your group membership status, which tells you whether you belong to the group or not. If you are not a member, click the green hyperlink to subscribe.

- Click “Join” to confirm.

- For open membership groups, you will be added automatically. For private groups, the group manager will approve or deny your membership request at their earliest convenience. Once you are subscribed, you will be able to view all content and add content to the group.

If you have any questions, please do not hesitate to contact the AIR social learning team at **cs10k@air.org**. You can also follow us on Twitter **@CS10K**. We look forward to “seeing” you in the community!
