

Each university that participating in the Cadence University Program is required to maintain a web page that abides by the following guidelines:

- The web page must be accessible to the public (that is, not require any passwords)
- The web page must clearly indicate the name of the university and include the "Cadence University Program Member" subtitle
- The web page must clearly indicate that the page is only Cadence-information related (that is, it does not include information on any other vendor's products on this page)
- The web page must not be called a "Cadence Homepage"
- Ensure proper use of the name Cadence: Cadence is the name of a company; students do not “learn Cadence”— they learn about Cadence products
- This web page should be linked from the licensing department's top-level page
- The content of the page should include how Cadence products are used in classes and for which academic research projects. Please select from the following list and include on your web page.
 - Custom IC
 - SiP
 - Digital IC
 - Verification
 - SPB (PCB)
- The web page must include the name and contact information of the person responsible for the site, and the date the site was last updated
- The web page must include the following footnote at the bottom of the page: “Cadence is a registered trademark of Cadence Design Systems, Inc., 2655 Seely Avenue, San Jose, CA 95134.”

Additional material developed by the university to aid in use of Cadence software is optional; if such material is included on the web page, please include the following disclaimer:

“Information is provided ‘as is’ without warranty of any kind. No statement is made and no attempt has been made to examine the information, either with respect to operability, origin, authorship, or otherwise. Please use this information at your own risk. We recommend using it on a copy of your data to be sure you understand what it does under your conditions. Keep your master intact until you are satisfied with the use of this information within your environment.”
