Bilateral Symmetry

Requirements:

1. Photo must be a face shot of YOU (see proviso below)
2. Face must be straight into camera (like a driver’s license)
3. Use even lighting (a flash sometimes helps even out lighting conditions)
4. Use a plane background
5. No hats, earrings, or neckwear
6. Submit a Powerpoint slide showing the original photo and the two mirrored versions

Submissions that fulfill all the above requirements will qualify for up to 1% added to your final grade in MSE 605, at my discretion.

If you can manage to do all this with an animal, I will consider giving another 1% bonus, but the picture must be one of your own (not something you found online).

By submitting this optional assignment you give me permission to use your images in this and future classes.

The deadline for submission is Thursday, 6 December 2018.
