The College of Engineering at Boise State University invites interested applicants to apply for a lecturer position to teach undergraduate courses required by multiple engineering majors.

The successful candidate will be required to contribute to the College of Engineering by teaching a combination of some of the following foundational courses:

- introduction to engineering
- statics
- dynamics
- circuits
- fluids
- mechanics of materials
- introductory programming

We place strong emphasis on quality teaching; instructional consistency is a key component for building core prerequisite knowledge for upper division coursework.

A master's degree in engineering or closely related field is required, doctoral degree preferred, along with demonstrated excellence in teaching.

The College of Engineering, ranked 15th in U.S. News & World Report’s list of best undergraduate engineering programs among comprehensive public universities, is experiencing tremendous growth and receives a high level of support from the high-tech industry in Idaho and the Intermountain West. With nearly 20,000 students, Boise State is the largest university in Idaho.

The university is located in Idaho’s capital city and largest metropolitan area, which serves as the government, economic, business, health care, and cultural center of the state. Boise offers beauty and adventures both outdoors and within its thriving arts scene; offering convenient access to outdoor recreation, including world-class whitewater, skiing, biking, fishing, and camping.

Application procedures: Qualified applicants should send a cover letter, resume/CV, statement of teaching interests and experiences as well as contact information for at least three professional references to Kelli Rooney at krooney@boisestate.edu.

Review of applicants will begin June 25, 2012 and will continue until a qualified applicant pool is established.
