Engineer – New Graduate (#5647)

Our New Graduate Engineer program is designed to hire engineering students earning their bachelor’s degree into full-time regular positions upon graduation. We seek graduating students who have earned engineering degrees in various areas including mechanical, electrical and civil disciplines.

Our intent is to allow the New Graduate Engineer to gain exposure to different groups within the Engineering department including Systems, Design, Plant Support, Reactor Fuels and Technical Services. The new Engineer will earn qualifications within their first year which qualifies them for promotions after their first year of employment.

**Job Requirements:** Requires a Bachelor’s degree in Engineering from an accredited college or university or a PE license obtained by accredited examination and zero to three years of discipline engineering experience. A high school diploma or GED is required.

**Summer 2016 Internships**

**Job Requirements for all Internships:** Requires fulltime status in a Bachelor’s degree program at an accredited college or university. Must have obtained a Junior or Senior status level at the time the internship commences and maintain a minimum 2.8 cumulative G.P.A. unless approved by Human Resources.

Note: Room and board expenses are not reimbursable.

**Intern positions will be posted on our website by January 2016.**
